SYEDA ZOBIA ASHRAF

Software Engineer | Full Stack Developer

zobiaaashraf@gmail.com | +923494113155 | Karachi | Linkedin | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of experience delivering scalable web and mobile applications using Angular, React, React Native, Next.js, Node.js, and .Net. Contributed to multiple enterprise SaaS products, building logistics, ERP, CRM, onboarding, real-time tracking, and AI-powered solutions.

Strong focus on frontend development with hands-on experience across REST APIs, authentication, MongoDB, SQL, third-party integrations, and backend-connected features. Experienced with the full development lifecycle and AI-assisted development using Cursor, Claude, GitHub Copilot, Vercel v0, and Lovable.

SKILLS

Frontend
Angular, React.js, Next.js, React Native, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, Recharts

Databases
MongoDB, Mongoose, SQL

AI-Assisted Development
Claude, Cursor, Vercel V0, Lovable, GitHub Copilot, Google Gemini API

Backend and APIs
Node.js, .NET/.Net Core, REST APIs, Webhooks, JWT Authentication, Third-Party API Integrations, Auth.js

Tools / Platforms
Git, GitHub, Bitbucket, Jira, AWS, Docker, SendGrid, Vercel, Vercel Blob, CI/CD, Figma, Postman

EXPERIENCE

Freelance | Full Stack Developer May 2026 – Present | Remote

- Developed mobile application features using React Native, including Firebase Cloud Messaging (FCM), push notifications, authentication, and real-time app services.
- Contributed to .NET/.NET Core applications, implementing and integrating frontend functionality with REST APIs and database-driven features.
- Delivered project-based freelance work, collaborating with clients and stakeholders to translate requirements into production-ready features and iterative releases.

Shispare | Associate Software Engineer Jan 2024 – Dec 2025 | Karachi, Pakistan

- Developed and maintained 6+ scalable SaaS-style web and mobile applications using Angular, React, React Native, TypeScript, Next.js, and Node.js.
- Worked on enterprise-grade logistics, CRM-style dashboards, onboarding workflows, ERP-style, and warehouse management systems used in 3 live business operations with up to ~7000 combined monthly visitors.
- Integrated REST APIs, third-party services, authentication systems, real-time tracking features, document management workflows and webhook-driven workflows across enterprise applications.
- Contributed to AI-assisted development workflows using Cursor, Claude, Vercel V0, and GitHub Copilot to accelerate prototyping and feature delivery.
- Improved frontend performance by 20–30% through reusable component architecture, lazy loading, and optimization techniques.
- Collaborated with Product, QA, and Engineering teams in Agile sprints, contributing to a 14% increase in sprint release velocity and delivering scalable, production-ready enterprise solutions.

CaterpillHERs | Frontend Developer Intern Feb 2023 – Jun 2023 | Remote

- Built onboarding and user workflow features including forms, profile management, and API integrations.
- Refactored frontend components to improve performance, maintainability, and browser compatibility.
- Contributed to testing, bug fixing, and Agile-based development cycles within a collaborative team environment.

EDUCATION

Bachelors of Science in Computer Science and Information Technology BSCS Apr 2021 – Dec 2024 | Karachi, Pakistan

Dawood University of Engineering and Technology

CGPA: 3.41 / 4.00

PROJECTS

TalentForge – Professional Networking & Job Portal

Next.js, React.js, TypeScript, Tailwind CSS, Node.js, MongoDB, Mongoose, Auth.js

- Developed a full-stack professional networking and job portal with authentication, role-based access, profile management, and backend data workflows.
- Built end-to-end modules including a social feed, job board, employer recruitment workflows, candidate applications, and analytics dashboards.
- Implemented resume management with PDF generation, file uploads using Vercel Blob, and backend data workflows using MongoDB/Mongoose and server actions.

Docraft - AI-Native Document Editor

Next.js, TypeScript, MongoDB, TipTap

- Built a collaborative document editor independently using Next.js, TypeScript, TipTap, and MongoDB/Mongoose, with PDF, Markdown, and text export plus sanitized file imports.
- Implemented backend access control for owner, editor, and viewer roles using signed JWT session cookies (JOSE), Zod validation, and version-number conflict detection to prevent conflicting edits.
- Developed autosave with an 800 ms inactivity delay, comment and version-history features, and automated snapshots with duplicate prevention and server-enforced timing rules, backed by Vitest tests.

Ledger – Personal Finance Tracker

Next.js, React.js, MongoDB, Mongoose, Tailwind CSS, Recharts, SheetJS, Google Gemini API

- Developed a full-stack personal finance application, featuring transaction management, monthly financial analytics, debt tracking, and interactive dashboards with real-time data visualization.
- Reduced manual data entry by 95% (from 60 to 3 seconds) by implementing Excel/CSV import and integrating Google Gemini AI for automated receipt processing with an editable review workflow before saving.

Artificial Neural Vision (ANV) - FYP

Python, PyTorch, CNN, LSTM, EfficientNet, BERT, Embedded Systems

- Developed AI-powered smart glasses for visually impaired users using real-time computer vision and embedded systems.
- Implemented image captioning using CNN, EfficientNet, and transformer-based models, with text-to-speech for real-time audio descriptions.

CERTIFICATIONS

- Google AI Essentials — Google, Coursera
- Google Data Analytics Specialization — Google, Coursera
